The Third Mobility / Project Meeting, Katerini-Greece -Platon M.E.P.E, 10-11  
October 2018

„An extraordinary experience. Travelling to Greece meant a lot to me, I discovered new places but loaded with history, the perfection of being born here. I went to this project alongside some wonderful people, and now our team was joined by Patricia who brought a new breath and added motivation to our team. I was happy to come back with my colleagues in Spain, and those in Greece proved to be the perfect hosts. The debates in the project took place in a very beautiful, well-organized, modern school, which can easily become a worthy model in Romania. I would like to have the opportunity to learn in such a school. All of the above have made me say that this trip has been the most beautiful one so far. Thank you Greece!"- said Elena Ana Maria Truță, 7th grade, "Gheorghe Țițeica" Secondary School Craiova, team coordinator of Romania.

„ I am going to start with the first day of meetings. Each of the four teams presented the progress and the practical activities that they have made since the last meeting. We have presented the three activities of the school, namely the play, the gym and the greening action. We briefly spoke about the fact that we were involved in these projects through various activities where we talked to the architects designing the room or we learned and prepared the play, of course with the help of an English teacher.

On the second day the children were separated from the teachers, some questions were asked about the project, the people that helped us, questions about how we plan our meetings and what skills do we need to be involved in a project like this. There were also contradictory opinions, but they taught us more about constructive criticism. One of the most interesting questions asked by the mentor was what skills do we need to be a part of this project. I responded quite quickly and convincingly saying that we need to know English very well, to know how to work in a team, to think freely and creative, and to have a well-developed entrepreneurial spirit.

After an hour of interesting discussions in which I did not even feel the time, but what can you do? it flies ;it was time to get back to our teachers.

At the end of the second day we visited the tourists attractions in the area, for example the Mount Olympus and a small village built in rock. Indeed, the landscape was fascinating, and with the occasion of the walk we were able to discuss some misgivings about previous discussions, but we were also able to know each other better and even make comparisons between our schools.

In conclusion, the experience was really wonderful. We presented our progress, visited new places, and met children of our age and is amazing that we are still in touch with them" said Elena Patricia Mitulețu, 8th grade, "Gheorghe Țițeica" Secondary School of Craiova, the second team coordinator in Romania.

And in the expedition ... and then ... Bonus Mount Olympus ... Wonderful host - Greece!
